

Custom Robotics Development

Mechanical, electronic, embedded firmware, and AI development — end to end

Custom robotics development spanning mechanical design, electronic circuit design, embedded firmware, and AI. From ROS/ROS2 integration and AI vision systems to control board design and production-ready robotics platforms — across any domain (industrial, UAV, ground robotics, and more).

■ Pricing Plans

Plan	Price	Overview
Silver	\$5,000+	- Basic mechanical & electronic design - For small-scale projects
Gold	\$15,000+	- Mid-scale development with ROS/ROS2 integration - AI vision system integration
Platinum	\$30,000+	- Full production-ready solution - Control board design through production optimization

■ Core Capabilities

- ✓ Mechanical design
- ✓ Electronic circuit & PCB design
- ✓ Embedded firmware development
- ✓ ROS / ROS2 integration
- ✓ AI vision system development
- ✓ Production-ready platform engineering
